RESOLUTION TO APPLY FOR COMMUNITY PROJECT FUNDING THROUGH THE EPA STAG INTERIOR SUBCOMMITTEE GRANT TO SUPPORT THE UPGRADE AND IMPROVEMENTS TO THE ERNEST E. JONES WASTEWATER TREATMENT PLANT IN THE CITY OF STARKVILLE

WHEREAS, the Board of Aldermen of the City of Starkville, Mississippi (the "Board"), acting for and on behalf of the residents and citizens of Starkville and the future customers of the Starkville Utilities Department do hereby find and determine as follows:

1. The City of Starkville, the county seat of Oktibbeha County, and the home of Mississippi State University has experienced unabated growth over the past four decades.

2. The wastewater treatment plant has served the citizens of Oktibbeha County and the City of Starkville since its original construction in 1979 and its expansion in 1988 and upgrade in 2001. It now also serves not only the City of Starkville but Mississippi State's primary campus and other parts of Oktibbeha County through an agreement with Mississippi State University.

3. The City of Starkville has been aggressively working toward a structured plan that will provide the necessary replacements to the equipment which has exceeded its useful life. This plan allows for continued operation in the most efficient and effective and safest manner currently required by the Mississippi Department of Environmental Quality (MDEQ) and the Environmental Protection Agency (EPA).

4. The focus of the Community Project Funding STAG grant is to improve and support basic infrastructure improvements under Title VI of the Clean Water Act, 33 U.S.C. 1381 et seq. to underserved areas and to rural areas that are desirous of improving the quality of life and receiving basic services. This sewer project appropriately addresses those federal and state concerns by extending additional service opportunities to areas that currently cannot be served due to wastewater plant infrastructure age limitations while addressing the needed upgrades to maintain a high quality of service to current customers

5. The City of Starkville has not neglected the obligation to upgrade our facilities and has funded upgrades to the wastewater treatment plant to address sustainability and long-term solutions. The recent investment of facilities and treatment processes to convert the sludge to Class A biosolids is an example of the future focus and proactive management of the City's wastewater treatment responsibility.

6. The City has invested in a comprehensive engineering report to address the current status of the wastewater treatment plant, facilities and processes and capacity in order to adequately serve the community for existing customers as well as long-term projected growth.

7. That engineering report has revealed critical elements that must be addressed quickly to prevent failures, compliance issues or unsafe conditions from escalating to reach unacceptable levels of possible permit violations impacting all parties served.

8. The use of the STAG grant will be a direct and immediate benefit to the current residents; allow for compliance as well as future growth and expansion in the underserved areas. It will thus be a responsible use of the funds from taxpayers' dollars. The proposed improvements will affect directly those who pay into the system with a return on that investment through tangible, impactful and daily results of such an investment.

NOW, THEREFORE, BE IT HEREBY RESOLVED that the Board of Aldermen of the City of Starkville do find that:

THE APPLICATION FOR A COMMUNITY PROJECT FUNDING GRANT REQUEST FROM THE U.S. HOUSE OF REPRESENTATIVES AND THE UNITED STATES SENATE IS THE PRUDENT AND MOST RESPONSIBLE APPROACH TO CONTINUE TO PROVIDE QUALITY SEWER SERVICE FOR THE RESIDENTS AND CUSTOMERS OF THE STARKVILLE UTILITIES DEPARTMENT AND THAT SUCH AN APPLICATION IS IN LINE WITH THE INTENT OF THE CONGRESSIONAL LEGISLATION.

Upon the motion of Alderman Jeffrey Rupp, duly seconded by Alderman Kim Moreland for the Board of Aldermen to approve the Resolution, the Board of Aldermen voted after discussion, in favor of the foregoing resolution as follows:

Alderman Kim Moreland	Voted: Yea

Utilities staff discovered a failed sewer line crossing Josey Creek on Wednesday, March 19, 2025 which was allowing direct discharge of sanitary sewer into the receiving stream. This failure was caused by stream bank erosion on either side of the large conveyance channel unearthing the casing on either side as well as the accumulation of a large amount of debris in the channel causing additional scour and erosion. The team immediately went into action to perform the repair needed to stabilize the piping system including the addition of some additional steel casing to extend the protection of the main sewer line across the creek. Staff were able to locate some available steel casing that could be delivered and on-site on the following day, Thursday, to start the repair, therefore two quotes were not able to be received in the interest of time and expediency to correct the issue.

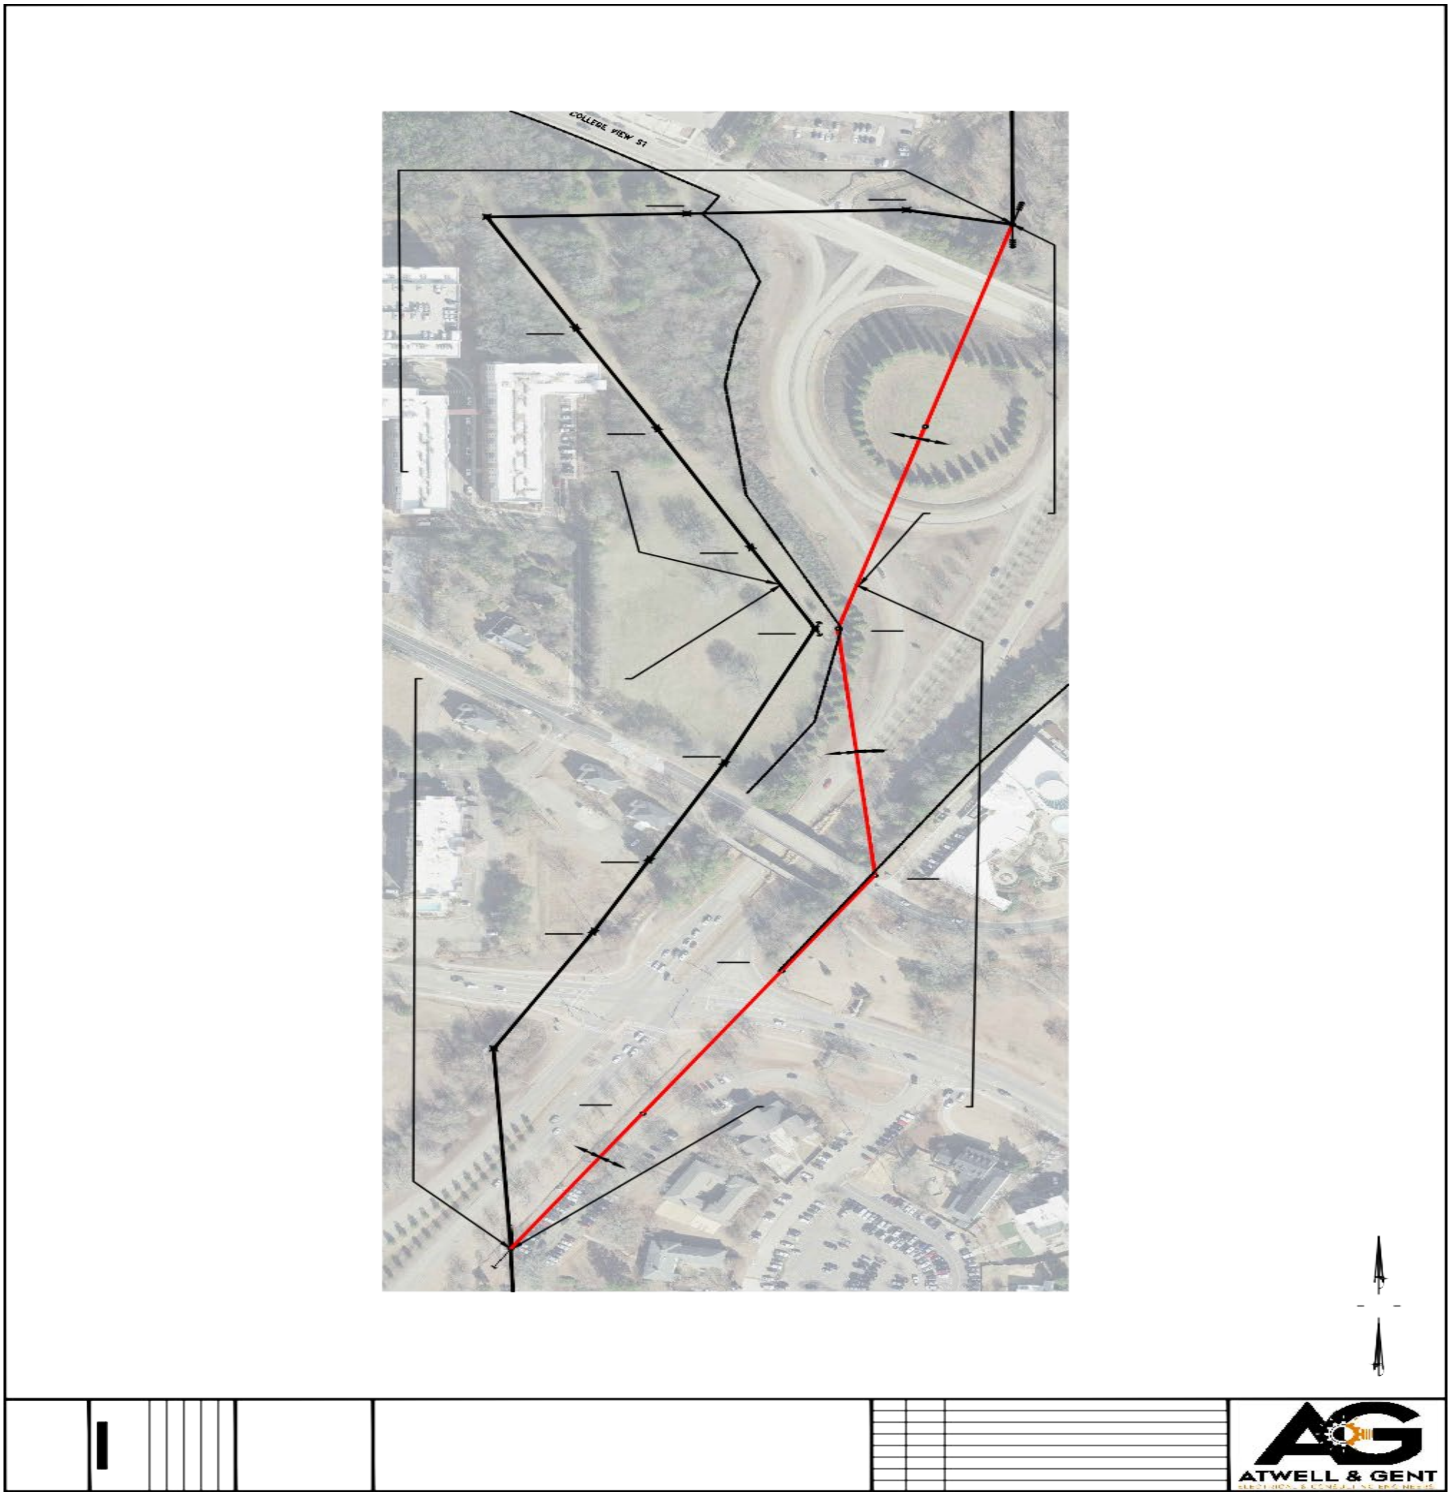
Upon the motion of Alderman Rupp, duly seconded by Alderman Moreland, and adopted by the Board to approve the April 1, 2025 Official Agenda, and to accept items for consent, whereby the "approval of the Memorandum of Understanding between the West Side Fund V, LLC (MSU Foundation) and the City of Starkville outlining the responsibilities related to relocation of the overhead 69kV transmission line" is enumerated, this consent item is thereby approved.



MEMORANDUM

SUBJECT:	Relocation of Section of Starkville Primary to MSU 69 kV Transmission Line - Starkville, Mississippi
DATE:	3/10/2025
TO:	Edward Kemp, General Manager Starkville Utilities
FROM:	Jeffrey Atwell, P.E.

Scope of Work

The Mississippi State University Foundation has requested that Starkville Utilities relocate a portion of its Starkville Primary to MSU 69 kV transmission line to facilitate construction of proposed new facilities along the west side of SR 12 between Collegeview Street and south of Russell Street. Work proposed includes relocating approximately 0.50 miles of 69 kV transmission line as shown on the attached sketch. The Mississippi State University Foundation hopes to have this line relocated by the first quarter of 2026.

Justification for Work

This relocation work will facilitate construction of Mississippi State University Foundation's proposed new facilities along the west side of SR 12 between University Drive and south of Russell Street. Also, this relocation will facilitate additional development along the west side of SR 12 between University Drive and Collegeview Street. Finally, this relocation will shorten the 69 kV transmission line route, make it more accessible by bringing it closer to existing surface streets, and reduce line exposure to trees and other vegetation.

Cost Estimate

The estimate of probable cost for this work is $833,700. All costs for this work will be paid for by the Mississippi State University Foundation.

Responsibilities

Starkville Utilities or its contractors will construct all work associated with this project and the Mississippi State University Foundation will pay for all work. We anticipate a memorandum of understanding which details each party's responsibilities being agreed to and approved prior to Starkville Utilities issuing purchase orders for any materials or awarding contracts for construction of the project

Recommendation

We recommend Board approval to advertise for steel structures and appurtenances for the transmission line relocation project and approval to advertise for construction of the transmission line relocation project.

309 University Drive, Starkville, MS 39759 | p: 662.324.5658

MEMORANDUM OF UNDERSTANDING

This Memorandum of Understanding (the "MOU") is made and entered into as of the 8th day of April, 2025, by and among West Side Funds V, LLC (the "West Side") acting by and through its Board of Directors and the City of Starkville Mississippi (the "City"), acting by and through its Mayor and Board of Aldermen, collectively the Parties, to effectuate the relocation of a section of overhead 69 kV transmission line which is owned, operated and maintained by the City, and is in conflict with facilities planned to be constructed by the West Side.

WITNESSETH

Whereas, the City and the West Side share the same goals of encouraging economic development in the City of Starkville and at Mississippi State University; and

Whereas, the West Side has requested that the City of Starkville relocate a portion of its Starkville Primary Substation to MSU Substation 69 kV transmission line to facilitate construction of proposed new West Side facilities along the west side of SR 12 between University Drive and the south side of Russell Street and to facilitate construction of new facilities by others between University Drive and Collegeview Street; and

Whereas, work proposed includes relocating approximately 0.50 miles of 69 kV transmission line as shown on the attached Exhibit; and

Whereas, the West Side desires to have this line relocated by the first quarter of 2026; and

Whereas, the City and the West Side will all benefit from relocation of said 69 kV transmission line; and

Whereas, the purpose of this MOU is to set forth the duties and obligations of the Parties with respect to said 69 kV transmission line relocations; and

Now Therefore, the Parties agree as follows:

1. **Recitals.** The recitals above are incorporated into this MOU.

2. **Ownership and Maintenance.** Both existing and new sections of the Starkville Primary Substation to MSU Substation 69 kV transmission line will remain the property of the City of Starkville. This MOU does not give the West Side any ownership or property interest in these transmission line facilities. The City will continue to maintain all existing facilities until they are removed from service and will maintain all new facilities after they have been constructed, inspected, and accepted by the City.

3. **Control.** The City or its agents shall be responsible for the design, bidding and construction of said transmission line relocations as well as establishing constraints on outage scheduling and durations, work constraints, sequencing, and overall operation of the City's 69 kV transmission system and this specific 69 kV transmission line section.

4. **Schedule.** The City will make its best efforts to meet the West Side's relocation schedules, however external factors outside the City's control, such as transmission structure and appurtenances delivery times, and availability of construction labor, will impact the City's relocation schedule. Additionally, as a part of the design and bidding of the project, the City will provide plans for constructing temporary relocations, along with actual bid costs, which will likely be required to meet the West Side's relocation schedule.

5. **Costs.** The West Side will be responsible for reimbursing the City of Starkville for all costs associated with said transmission line relocations. The West Side, by executing this MOU, is committing to paying the City for the actual costs of said work. Once bids are received and actual costs ascertained, should the West Side opt to proceed with construction of said work, the West Side shall make Contribution in Aid to Construction (CIAC) payment to the City within 30 days after receipt of bids. CIAC payment to include all costs associated with the project including construction, materials, planning, engineering, inspection, construction administration or other necessary to successfully complete the project. Otherwise, should the West Side opt not to move forward with said relocations, the West Side shall reimburse the City for all actual expenses incurred, including the obligation to purchase relocation materials through acceptance of material bids and issuance of a Purchase order.

6. **Work Changes.** Should work changes be required due to unforeseen conditions approved by the City or other changes requested by the West Side and as mutually agreed to by Parties, the CIAC shall be adjusted as applicable. If the CIAC increases as a result of work change, the West Side shall make additional payment to the City prior to approval of said change. Otherwise, should the CIAC decrease, the City shall make payment to the West Side for any decrease in the CIAC prior to approval of said change. Ultimately, the City has the right to approve or deny any requests related to the construction, materials or contract which may result in an increase or decrease in contract amount or contract time.

7. **Easements.** This relocation work is contingent upon the City receiving a 75-foot wide transmission line easement from all affected property owners for the relocated transmission line route. Award of a construction contract will not be provided by the City until all necessary easements have been provided and executed. Once transmission line relocations are complete and the new transmission line is placed into service, the City will quitclaim any existing

easements for portions of the transmission line route that have been removed. The West Side is responsible for removing all vegetation in proposed relocated line easements in advance of the transmission line construction.
